QUOTE INSTRUCTIONS

The BIA invites the quoter to submit a firm-fixed price quote for the requirement: **Installation of New Electrical Conduits and Wire, Relocation of Veeder Root Tank Monitoring System.** The BIA will consider award under NAICS 238190 - Other Foundation, Structure, and Building Exterior Contractors. This procurement is 100% set-aside for Small Business under the authority of 25 U.S.C. 47.

This is a combined synopsis/solicitation for commercial items prepared in accordance with the Federal Acquisition Regulations (FAR) Part 12: Acquisition of Commercial Items, Subpart 12.6, as supplemented with additional information included in this notice and the Statement of Work (SOW) available at <http://www.bia.gov/WhoWeAre/AS-IA/OCFO/Acquisitions/CurrentHQ/index.htm> on or about the date of this posting. This announcement constitutes the only solicitation; a quote is being requested and a written solicitation will not be issued. The Request for Quotation (RFQ) number A12PS01909 is to provide Installation of New Electrical Conduits and Wire, Relocation of Veeder Root Tank Monitoring System for the United States Department of the Interior (DOI) Bureau of Indian Affairs. The following FAR provisions and clauses apply to this procurement; 52.212-1, 52.212-2, 52.212-3, 52.212.4, 52.212-5, 52.219-6, 52.222-3, 52.222-6, 52.222-19, 52.222-21, 52.222-26, 52.222-35, 52.222-36, 52.222-37, 52.225-13, 52.232.33, 52.223-9, 52.223-15, 52.222-50, 52.223-18, 52.225-1, 52.225-13, 52.204-7, 52.232-36, 52.233-3, 52.233-4, 52.252-2 and DIAR 1452.226-70 and 1452.226-71. Potential offerors are reminded award can only be made to a Contractor registered in the Central Contractor Registration (CCR) database located at website www.ccr.gov.

This procurement is being solicited, offered, evaluated, and awarded using the simplified acquisition procedures in FAR Part 13, along with FAR Part 12, Acquisition of Commercial Items. The BIA will award based upon "Best Value" methodology using the following evaluation factors. For this requirement, all evaluation factors other than cost or price, when combined are more important than cost or price. The evaluation criteria are as follows:

Factor 1 – Technical Capability

Factor 2 – Past Performance

Factor 3 – Price

The Contractor shall provide a fixed price quotation via e-mail for the attached SOW by 1800 EST 08/06/2012. Quotations must include the following: (A) a detailed breakdown of all costs proposed in response to this requirement; (B) a project plan describing the offeror's technical capability and proposed methodology for performing the tasks in the SOW; (C) examples of recent, relevant past performance. To receive full consideration, respondents

must completely address each criterion in the SOW. Please provide general business information such as Tax Identification Number (TIN), business classification, and socioeconomic status.

Submission must be sent electronically to Darren M. Nutter, Contracting Officer at darren.nutter@bia.gov.

ADDITIONAL INFORMATION: In accordance with FAR 52.212-1(k), prospective awardees shall be registered and active in the CCR database prior to award. Offerors may obtain information on registration at www.ccr.gov.

Prospective awardees are encouraged to complete the annual electronic representations and certifications found at the ORCA website at <https://orca.bpn.gov>.

Quotes must include the following:

1. Quotation number, offeror's name and address, point of contact, phone number, fax number, e-mail address (if available), DUNs number, and TIN on cover sheet.
2. Pricing breakdown

Failure to provide this information may cause your quotation to be considered non-responsive.

APPLICABLE PROVISIONS AND CLAUSES: The following clauses and provisions are incorporated by reference. FAR clauses and provisions can be read in their full text at <https://www.acquisition.gov/far/> and DOI Acquisition Regulation (DIAR) clauses and provisions can be read in their full text at: http://ecfr.gpoaccess.gov/cgi/t/text/text-idx?sid=50def0b876ad2ef1f411be79c91366eb&c=ecfr&tpl=/ecfrbrowse/Title48/48cfrv5_02.tpl#1400

The clauses are to remain in full force in any resultant contract.

52-212.4, 52.212-5, 52.219-6, 52.222-3, 52.222-6, 52.222-19, 52.222-21, 52.222-26, 52.222-35, 52.222-36, 52.222-37, 52.225-13, 52.232.33, 52.223-9, 52.223-15, 52.222-50, 52.223-18, 52.225-1, 52.225-13, 52.204-7, 52.232-36, 52.233-3, 52.233-4, 52.252-2 and DIAR 1452.226-70 and 1452.226-71

All mandatory statutes, regulations, and policies that are not stated within this solicitation shall apply to this solicitation and the resultant contract or purchase order.

**STATEMENT OF WORK
FOR
BUREAU OF INDIAN AFFAIRS
Pima Agency, San Carlos Irrigation Project – Indian Works
(SCIP-IW)**

**Installation of New Electrical Conduits and Wire for New Card Reader and
Relocation of Existing Veeder Root Tank Monitoring System**

Building 98, 204 West Pima Street, Sacaton, AZ 85147

PROJECT DESCRIPTION

San Carlos Irrigation Project - Indian Works (SCIP-IW) is currently upgrading the fuel dispensing and monitoring system of the existing above ground fuel tank that is located at O&M Yard, 204 West Pima Street, Sacaton, AZ, 85147. In addition, the existing Veeder Root Tank Monitoring System will be relocated to the SCIP-IW Quonset Hut building 98.

LOCATION

Pima Agency, SCIP-IW, O&M Yard, 204 West Pima Street, Sacaton, AZ 85147. All construction will revolve around the area of and inside of the Quonset Hut- -Building 98.

SCOPE OF SERVICES

Contractor shall furnish sufficient technical, supervisory, and administrative personnel to ensure the expeditious accomplishment of the work. Additionally, contractor shall furnish all necessary services, supplies, materials, equipment, investigations, studies, travel, labor, and all costs associated with this project.

The project consists of:

Grading and installation of a new 5ftX5ft square concrete pad in front of the existing above ground fuel tank for later installation of a new card reader. Exact location to be identified by purchaser.

Trenching will be required from the existing above ground fuel tank area to the present Quonset Hut Building 98 to the west of the fuel tank.

Contractor is to provide and install new electrical conduit and wire for the new card reader into the existing electrical panel inside of the building and tie into the existing fuel equipment on the tank for the new fuel system upgrade.

Contractor is to provide new electrical conduit and new communication cable from the new card reader at the tank to the designated office area inside the building. This is to tie into an owner provided PC computer system.

Contractor is to move the existing Veeder Root tank monitoring system from the Tribal Roads Building and reinstall the system to the designated office area in the Quonset Hut building 98 in the same area as the new card reader location. This relocation will require trenching and installation of new electrical conduit, wiring, and communication cable from the tank area to the Building 98 and the designated office area.

Contractor shall tie the new installation into the Veeder Root fuel equipment, provide testing and readiness confirmation of the new installation, run a sample print out to provide proof of operational output, with designated user group prior to project close-out.

Contractor will provide Blue Stake or proof of other qualified Utility Locator Service prior to commencing construction.

Contractor shall accept directions or clarification for this project from the Contracting Officer or the duly authorized on-site Contracting Officer's Technical Representative (COTR). Requests or desires of the Occupying Program User made directly to the Contractor will be immediately brought to the attention of the COTR. Any changes to the project scope or other provisions of the Statement of Work (SOW) must be requested by the contractor in writing and must be authorized in writing by the Contracting Officer prior to any project changes.

SPECIAL CONSIDERATIONS

Contractor must have a minimum of one person in a supervisory capacity overseeing field work/employees during the duration of this project. The supervisory individual may be a superintendent, project manager, lead foreman, and/or supervisor, (or other similar field supervisory classification).

All work will be subject to the inspection and approval of the Gila River Indian Community, Facility Management Department.

COMPLIANCE WITH REGULATIONS

Contractor shall comply with 29 CFR 1926, Subpart C, General Safety and Health Provisions including and not limited to the following:

- 1926.20 – General safety and health provisions.
- 1926.21 – Safety training and education.
- 1926.23 – First aid and medical attention.
- 1926.27 – Sanitation.
- 1926.28 – Personal protective equipment.
- 1926.202 – Barricades.

SITE VISIT / INSPECTION

Contractor shall conduct an on-site assessment to determine existing conditions , building layout and overall site layout.

Contractor shall verify all items of work and notify the on-site COTR of any discrepancies or concerns they may have prior to bid completion/submission or performing any work.

Serious potential bidders are encouraged to participate in an on-site assessment to determine existing conditions, building layout, and overall site layout. To schedule an on-site assessment visit prior to bid completion, the Contractor shall contact Mr. Chris Blackwater, Lead Irrigation System Operator, SCIP-IW, at 520-562-3372, office phone, or 520-709-0036, cell phone, to arrange for inspection of the areas identified for work under this project.

DISPOSAL OF DEMOLISHED MATERIALS

Remove debris, rubbish and other materials resulting from demolition and removal operations from site. Transport and legally dispose of materials off site. Debris disposal shall be the responsibility of the contractor. The contractor shall make arrangements for disposal of all construction debris, and non-asbestos containing building materials. Use of explosives and burning of razed materials shall not be permitted on project site.

CLEAN-UP AND REPAIR

Upon completion of the project, remove all tools, equipment and keep site clean. Return structures and surfaces to condition existing prior to commencement of work. Soil replaced from trenching will be compacted to previous ground level. Repair adjacent construction or surfaces soiled or damaged by project.

END OF STATEMENT OF WORK
