DIVISION E—DEPARTMENT OF THE INTERIOR, ENVIRONMENT, AND RELATED AGENCIES APPROPRIATIONS ACT, 2009

TITLE I—DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT

MANAGEMENT OF LANDS AND RESOURCES

Appropriation enacted, 2008	\$853,931,000
Budget estimate	864,827,000
Bill, 2009	890,194,000
Comparisons:	
Appropriations, 2008	+36,263,000
Budget estimate, 2009	+25,367,000

The detailed allocation of funding by program, activity and sub-activity is included in the table at the end of this section of the statement. In addition, the bill also includes the following specific funding levels and directions:

Land Resources.—Within the funds provided for soil, water, and air management, there is a program increase of \$7,500,000 for abandoned mine remediation and inventory in the West. Of this amount, a minimum of \$6,000,000 is for actions to secure, seal, and remediate hazards from known mine openings. An amount up to \$1,500,000 may be used for discovery and inventory activities.

Cultural Resources Management.—Within the amounts provided, there is an increase of \$500,000 to begin implementation of the Galisteo Basin Archeological Sites Protection Act of 2004 (NM).

Wildlife Management.—Within the funds provided there is an additional \$4,600,000 for the native plant materials development program. This funding and program has been moved out of the Department's wildland fire management appropriation account. This program should continue previous activities as part of the national fire plan working closely with the Forest Service, and develop a seed bank of desirable native plant species to be available for use in burned area restoration, habitat restoration, and other related purposes by all of the Interior land management bureaus. An annual report on the accomplishments and expenditures of the program should be submitted no later than 90 days after the end of the fiscal year.

¹This Explanatory Statement was submitted for printing the *Congressional Record* on February 23, 2009, prior to House consideration of the bill and as directed by the House of Representatives in section 2 of H. Res. 92 (as amended by section 2 of H. Res. 108). The Statement appears in the February 23 *Congressional Record*, beginning on page H1653.

Recreation Resources Management.—Within the amounts provided, there is an increase of \$1,000,000 for management of the national scenic and historic trails.

Energy and Minerals.—The bill continues the same application for permits to drill (APD) fee as in fiscal year 2008, \$4,000 per APD, which is estimated to net \$36,400,000 during fiscal year 2009 to partially offset BLM administrative costs. In addition, the bill includes \$6,000,000 for Alaska legacy well remediation, no specific funds for gas hydrates research or North Slope science, and \$1,000,000 for oil shale sample shipment and storage in Colorado. The discretionary funding total for oil and gas management is \$79,478,000, which when added to the APD fee receipts, and the off-budget pilot offices funds, is a small increase over the total fiscal year 2008 oil and gas management funding.

Future budget justifications should clearly delineate how the Bureau is complying with section 713 of the Energy Independence and Security Act of 2007 dealing with inventories of carbon dioxide sequestration in Federal mineral leaseholds.

Realty Ownership and Management.—Within the funds provided, there is an increase of \$750,000 for GIS/cadastral mapping in Utah.

Resource Protection and Law Enforcement.—Within the amounts provided, there is an increase of \$5,100,000 for drug enforcement on public lands.

Hazardous Materials Management.—Within the amounts provided, there is an increase of \$1,000,000 for activities related to southwest border problems.

Challenge Cost Share.—The Bureau should not set aside a specific allocation for the National Landscape Conservation System as was proposed in the budget request.

National Monuments and Conservation Areas.—The bill includes the various funding transfers proposed by the Bureau, and an increase of \$6,371,000 above the request, for a total of \$28,196,000 for the new National Monuments and Conservation Areas activity. Additional National Landscape Conservation System funding is included in the wilderness and recreation activities in this account, and in the Oregon and California Grant Lands account.

Healthy Lands Initiative.—Within the amounts provided there is a total of \$7,797,000 for the Healthy Lands Initiative, including \$750,000 in soil, water and air management, \$2,586,000 in rangeland management, \$150,000 in forestry management, \$867,000 in riparian management, \$2,602,000 in wildlife management, \$292,000 in fisheries management, and \$550,000 in the threatened and endangered species activity.

National Fish and Wildlife Foundation.—The bill includes \$3,000,000 to continue cost share activities as in the past, including \$1,917,000 in wildlife management, \$246,000 in fisheries management, \$246,000 in threatened and endangered species, \$345,000 in rangeland management, and \$246,000 in riparian management.

Other.—The Bureau should retain its current level of support for the National Conservation Training Center; funds should be made available to the Center within 60 days of enactment.

The detailed allocation of funding by program area and activity for the National Park Service account is included in the table at the end of this section of the statement. The amounts in this bill will support 20,923 full time equivalent (FTE) positions throughout the National Park Service, an increase of 622 FTE's over the number funded in 2008. This includes continuation of funding for the 3,000 new seasonal positions added in fiscal year 2008. Savings in personnel and contracting costs of \$9,855,000 compared to the request have been realized due to delayed enactment of the 2009 appropriations. In addition, the bill includes the following specific funding levels and directions:

Visitor Services.—Within the amounts provided for visitor services, the bill assumes an increase of \$3,300,000 above the amounts requested in the President's budget for the National Park Service portion of an expanded law enforcement effort to eradicate drug production and related activities on public lands.

Park Support.—The bill assumes funding of \$11,000,000 for the National Trail System, and \$1,750,000 for the Wild and Scenic Rivers program.

U.S. Park Police.—The \$96,555,000 provided in the bill for the U.S. Park Police annual operations budget includes sufficient funding for two additional recruit classes during 2009. In addition the bill includes the \$2,000,000 for security costs associated with the 2009 Presidential Inauguration.

Gettysburg National Military Park (NMP).—\$200,000 is provided to continue the restoration of historic battlefield landscaping at Gettysburg NMP.

National Mall Concerts.—The bill includes funding to continue support for the National Mall concerts program at the fiscal year 2008 level.

Youth Conservation Corps (YCC) and Public Lands Corps (PLC).—The bill includes not less than \$3,000,000 of funding in this account for projects to be carried out by the YCC program and not less than \$3,000,000 for projects carried out by the PLC. The Committees on Appropriations are fully supportive of these partnership programs, as well as similar partnership arrangements with the Student Conservation Association, and encourages expansion of these programs in 2009.

Special Resource Studies.—The bill includes sufficient funding to carry out all special resource studies authorized by law during the 110th and previous Congresses.

Harpers Ferry NHP.—The Committees on Appropriations appreciate the Service's efforts to commemorate the 150th anniversary of John Brown's raid on the arsenal at Harpers Ferry National Historical Park, and authorize the use of up to \$300,000 to defray the costs of the extensive events that will surround the anniversary.

Traditional and Folk Arts Heritage Programs.—The bill includes funding to continue National Park Service support of traditional and folk arts programs at parks whose mission includes preservation of these heritage traditions. The Committees are fully supportive of this important partnership program and encourage the National Park Service to expand its support of these programs in fiscal year 2009.

Haleakala National Park.—The Committees on Appropriations are aware and supportive of the potential development of an Advanced Technology Solar Telescope (ATST) within the Haleakala High Altitude Observatories site at the summit of Haleakala, Maui, Hawaii. As the proposed ATST construction site can only be accessed via a road through the Haleakala National Park, the Service is expected to work cooperatively with the National Science Foundation to effectuate the issuance of a Special Use Permit as soon as possible. In turn, the Foundation is expected to complete its analysis on the effects to service standards in a timely fashion so that the Service can fully comply with all procedural requirements, with a goal of completing the permitting process within 150 days of enactment of this Act.

NATIONAL RECREATION AND PRESERVATION

Appropriation enacted, 2008	\$67,413,000
Budget estimate, 2009	45,488,000
Bill, 2009	59,684,000
Comparisons:	
Appropriations, 2008	– 7,729,000
Budget estimate, 2009	+14,196,000

The detailed allocation of funding by program area and activity for the National Recreation and Preservation account is included in the table at the end of this section of the statement. The bill also includes the following specific funding levels and directions:

Cultural Programs.—The bill includes \$1,000,000 to initiate programmatic activities under the Japanese-American Confinement Sites Act (P.L. 109–441). The bill does not include \$1,000,000 re-

quested to begin an inventory of historic properties requested in the President's budget.

Heritage Partnerships Program.—The bill includes \$15,702,000 for the heritage partnerships program. This amount will fund all heritage partnerships authorized during the 110th Congress. Partnerships which received funding in fiscal year 2008 will be funded at the same level as they received last year. In addition, the bill provides \$148,000 of planning funds for each of three newly authorized heritage partnerships. The House and Senate Committees on Appropriations are concerned that the number of authorized heritage partnership programs has expanded rapidly in recent years and many more proposals are pending action by the authorizing committees. The Committees are in agreement that the amount of funding available for this program is limited; and that expanded funding for new heritage areas should be funded principally by savings which occur when mature programs are graduated from Federal support. The National Park Service is directed to develop new guidelines for this program which require self-sufficiency plans for all heritage areas within a reasonable period of time. The adoption of a credible self-sufficiency plan, or satisfactory work towards development of such a plan, should be a condition of continued funding for all plans after fiscal year 2009.

Statutory and Contractual Aid.—The bill includes \$5,600,000 for grants under the statutory and contractual aid program as follows:

State	Project description	Amount
AL	National Voting Rights Interpretive Center	\$350,000

Comparisons:	
Appropriations, 2008	– 1,401,000
Budget estimate, 2009	+2,842,000

The bill includes a direct appropriation of \$69,500,000 for the Historic Preservation Fund, offset by rescission of \$516,000 of prior year unobligated funding within this account. The detailed allocation of funding by program area and activity is included in the table at the end of this section of the statement. The bill also includes the following specific funding levels and directions:

Program Reductions.—The bill does not include \$10,000,000 requested in this account for the Preserve America program or \$2,000,000 requested to initiate an inventory of historic properties. The Committees on Appropriations believe that future funding for

the Preserve America program should be deferred pending a full evaluation of the effectiveness of the program in meeting national heritage tourism needs.

The detailed allocation of funding by program area and activity for the Construction account is included in the table at the end of this section of the statement. The bill also includes the following specific funding levels and directions:

Everglades.—The bill includes \$60,000,000 for the Modified Water Deliveries Project at Everglades National Park. This includes \$50,000,000 requested in the President's Budget for the Corps of Engineers. This funding level will allow construction of the first Tamiami Trail bridge to proceed expeditiously. The House and Senate Committees on Appropriations recognize, however, that this bridge is just a first step. As the next step in this critical restoration effort, the Secretary of the Interior, acting through the National Park Service, is directed to immediately evaluate the feasibility of additional bridge length, including a continuous bridge, or additional bridges or some combination thereof, for the Tamiami Trail (U.S. Highway 41) to restore more natural water flow to Everglades National Park and Florida Bay. The feasibility study and the recommendation of the Secretary should be submitted to the Congress no later than 12 months from the date of enactment of this Act. Language is included in the bill directing that this study be completed.

The second new proviso extends the authorization for the National Park Service Advisory Board for one year.

UNITED STATES GEOLOGICAL SURVEY

SURVEYS, INVESTIGATIONS, AND RESEARCH

Appropriation enacted, 2008	\$1,006,480,000
Budget estimate	968,516,000
Bill, 2009	1,043,803,000

Comparisons:

Appropriations, 2008	+37,323,000
Budget estimate, 2009	+75,287,000

The detailed allocation of funding by program, activity and sub-activity is included in the table at the end of this section of the statement. The bill includes the proposed global change research technical adjustments which move funds from several activities into the global change activity. The proposed reductions for travel are not included for any activity. In addition, the bill also includes the following specific funding levels and directions:

Geographic Research and Remote Sensing.—The bill includes \$1,000,000 for the national cooperative geographic information system mapping program but does not include the funding increase requested for the national land imaging program. The bill includes the requested reduction for geographic research and the transfer of priority ecosystems science funding to biological research. The bill fully funds the budget request of \$24,150,000 for the Landsat Data Continuity Mission and \$16,000,000 to continue the Landsat 5/7 program. Satellite development and launch costs associated with future US Geological Survey (USGS) land remote sensing operations should not be transferred from the National Aeronautics and Space Administration (NASA) to the Department of the Interior (DOI). These are functions that are not a component of current DOI operations but clearly fall within NASA's jurisdiction. Until a new plan for future land imaging and remote sensing coordination is drawn up that evaluates how satellite development, launch and operations should be funded, DOI should not undertake any action that attempts to assume the funding responsibilities that have traditionally been a part of the NASA budget.

Geologic Hazards Assessments.—The bill includes \$3,000,000 for the earthquakes portion of the multi-hazards initiative and \$500,000 for the one-time costs of seismological equipment at the Arkansas Seismological Observatory, but the requested reduction for earthquake grants is not included. There is a general increase of \$2,000,000 for volcano hazards research. The Survey should evaluate ongoing needs for important volcano research and monitoring in active areas, such as Hawaii, Yellowstone, the Cascades and Alaska, where the USGS maintains observatories. The bill also includes a \$1,500,000 increase for the global seismographic network.

Geologic Landscapes and Coastal Assessments.—The bill does not include the funds requested for the water census. The Administration should revisit that issue and consider resubmitting a more integrated program request in the next budget cycle. The bill moves funds for priority ecosystems science from earth surface dynamics to biological research as requested, and provides \$750,000 for Great Lakes region geological mapping within the National cooperative geologic mapping subactivity. The bill includes \$3,000,000 for extended continental shelf mapping in the Arctic Ocean, a total of \$1,000,000 for the ocean action plan coastal geology effort, and \$500,000 for California sea floor mapping.

Geologic Resources Assessments.—The bill provides the fiscal year 2008 funding level for the minerals resources activities and assessments and includes \$650,000 to initiate a minerals resource assess-

ment of federal lands in Nye County, Nevada, in collaboration with the University of Nevada, Las Vegas and the Nevada Bureau of Mines and Geology. The Survey's April 2008 petroleum resource assessment of the Bakken Formation was an important benchmark to further our nation's energy security. The Survey is strongly encouraged to expedite its efforts to conduct further applicable assessments or make additional data publicly available that can demonstrate the full range of energy resources in the stratigraphic sequences surrounding the Bakken Formation.

Ground Water Resources.—The bill does not provide funding for the Water for America initiative but it does include a \$500,000 general increase and \$900,000 for San Diego, CA, aquifer mapping. Although funding is not provided for new aspects of the Water for America initiative, the importance of this work is recognized and future budgets should consider a more integrated program request for this work.

National Water Quality Assessment.—The bill does not include the large reduction requested for this vital program.

Toxic Substances Hydrology.—As requested, the bill transfers funds for priority ecosystems science to the biological research program. In disagreement with the budget request, the bill continues funding for amphibian research and monitoring but moves that amount to biological research where the work will be accomplished.

Hydrologic Research & Development.—The bill provides \$270,000 to continue the Hood Canal, WA dissolved oxygen study, \$295,000 to maintain the San Pedro River partnership, AZ, \$400,000 for the Long Term Estuary Assessment Group, LA, and \$500,000 to continue work pursuant to the US-Mexico Transboundary Aquifer Assessment Act.

National Streamflow Information Program.—The bill does not include funds for the Water for America initiative but does include a general increase of \$2,000,000 for the stream gage program.

Hydrologic Networks and Analysis.—The bill maintains the fiscal year 2008 funding level for the ocean action plan in this sub-activity, provides \$497,000 to continue the Lake Champlain basin toxic materials study and \$500,000 to maintain Hawaii water resources monitoring activities. The Survey is encouraged to evaluate the need for selenium studies in Colorado and, to the extent possible, incorporate that work into other ongoing hydrologic research in the area.

Biological Research.—The bill includes the following: a total of \$750,000 for the Healthy Lands Initiative; the requested funds for priority ecosystems science; the fiscal year 2008 level for Pacific Northwest forest biology; \$650,000 for contaminant and endocrine biology research; \$200,000 for the science excellence program with the Fish and Wildlife Service; \$500,000 to maintain the San Francisco, CA salt ponds restoration science; \$800,000 to maintain the Leetown, WV molecular biology effort; \$750,000 to maintain amphibian research and monitoring; a \$1,000,000 increase for Great Lakes biological sciences; and a total of \$5,000,000 for National Biological Information Infrastructure. The Survey is encouraged to provide full support for the southern sea otter science and monitoring effort.

Facilities.—The bill provides the budget request, plus an additional \$4,000,000 for the deferred maintenance and capital improvement activity to continue the on-going project begun last year.

Global Climate Change Research.—The bill includes all of the internal funding transfers recommended by the Survey in order to establish this new budget activity, and an increase of \$14,045,000 above the total request. Within the amounts provided, \$10,000,000 is for the National Global Warming and Wildlife Science Center and at least \$3,000,000 is to implement required geological and biological carbon sequestration studies as required by sections 711, 712 and 714 of the Energy Independence and Security Act of 2007.

The National Global Warming and Wildlife Science Center funding includes \$2,500,000 to complete establishment of the Center. Additionally, the funding allows the Center to develop mechanisms that will ensure that it is responsive to the research and management needs of Federal and State agencies regarding the impacts of global warming on fish, wildlife, plants and ecological processes and the mechanisms for adaptation to, mitigation of, or prevention of those impacts. The recommendation also includes \$7,500,000 for the Center to fund research projects, including use of external and independent scientific peer review, to address the needs of resource management agencies and the American public through greatly accelerated global warming research and through development of decision support tools.

The Secretary, with the assistance of the USGS National Climate Change and Wildlife Science Center and a science advisory board, including members recommended by the National Academy of Sciences, should initiate development of a national strategy to assist fish, wildlife, plants, and associated ecological processes in becoming more resilient, adapting to, and surviving the impacts of climate change. In developing this national framework for flora and fauna conservation in a changing climate, the Secretary should consult with other Federal agencies, State fish, wildlife and conservation data agencies, Territories, Tribes, scientists, and stakeholders, and the Secretary should provide the public with notice and opportunity for comment.

Burned area rehabilitation funding has been reduced by \$4,600,000 because the Native Plant Materials Development Program has been moved to the BLM.

The Department and the Forest Service must work together, along with State and other partners, to maintain sufficient readiness with the preparedness program. The Department should do its utmost to maintain wildfire suppression capability at least at the same levels as in fiscal years 2007 and 2008. The Department should immediately notify the Committees on Appropriations if it appears that funding shortfalls may limit needed firefighting capacity.

It is imperative that both departments expedite deployment of the fire program analysis system in order to justify further investment beyond the current fiscal year.

The Department of the Interior and the Forest Service should continue reports required by the Committees on Appropriations previously and examine, using independent panels, any individual

wildfire incident which results in expenses greater than \$10,000,000.

Categorical Grants.—The bill provides \$1,094,855,000, which is \$58,648,000 above the request, adjusted to reflect the Underground Storage Tank Program's movement to the LUST account. Within this program area, the bill includes:

Climate Change Initiative Grants for Local Communities.—The Bill includes \$10,000,000 for the Office of Air and Radiation to initiate a new, competitive grant program to assist local communities in establishing and implementing their own climate change initiatives. The goal of this program is to implement programs, projects and approaches, which demonstrate documentable reductions in greenhouse gases and are replicable elsewhere. The Agency is directed to follow these guidelines to implement this Program: (1) grants are to be awarded on a competitive basis; (2) they are to be one-time grants only; (3) grantees, other than tribes, are required to provide a 50 percent match for the Federal funds; (4) local, county, municipal and tribal governments are eligible to apply; (5) five percent of the funds shall be allocated to tribal governments; (6) grants will fund planning activities, demonstration pilots, innovative approaches and implementation of projects designed to reduce greenhouse gases; (7) examples of eligible projects include land use planning, programs to reduce vehicle miles traveled, improvements to building energy efficiency and projects to capture methane from agriculture operations for use as an alternative to fossil fuels. The Agency is directed to report on its progress in implementing this grant program, including a summary of the projects funded, estimates of greenhouse gases reduced and suggestions for future implementation of the program.

Section 106 Pollution Control Grants.—The bill provides \$218,495,000 for pollution control grants authorized by Section 106 of the Clean Water Act. The House and Senate Appropriations Committees do not support the Agency's recent National Permit Discharge and Elimination System (NPDES) rulemaking to create an incentive pool of funds for States that charge NPDES fees and have not provided funds to implement this change. The Agency is directed to award Section 106 grants using the historic allocation formula. The Committees have also rejected the Agency's proposal to direct the entire amount appropriated for water quality monitoring to statistically representative monitoring programs and direct the Agency to follow the historic allocation criteria between State capacity building and national surveys, as provided in fiscal year 2008.

Underground Storage Tank Grants.—The amount remaining in this account and not moved to the LUST account, is directed to fund state activities not authorized by either section 9003(h) of the Solid Waste Disposal Act or the Energy Policy Act of 2005.

ADMINISTRATIVE PROVISIONS, ENVIRONMENTAL PROTECTION AGENCY

(INCLUDING RESCISSION OF FUNDS)

The bill includes two new administrative provisions which make permanent prior year limitations on the reimbursement of consultants, purchase of uniforms, and use of funds for facility construction projects. It also includes bill language concerning the Agency's

use of Title 42 hiring authority. The bill includes a \$10,000,000 rescission from the State and Tribal Assistance Grants Account as proposed in the budget request. The Committees further direct the Agency to take this rescission from the following programs:

- (1) Unobligated balances from the Title II Construction Grants program;
- (2) Unobligated prior-year balances from State categorical grant programs; and
- (3) Balances from special project grants appropriated in fiscal year 2002 or earlier which have not been obligated on an approved grant as of July 1, 2009.

The Agency is directed to provide a report to the Committees outlining the allocation of the rescission 15 days prior to implementation.

The bill includes a provision mandating that the Agency provide no less than \$6,500,000 from the Environmental Program and Management account for the Greenhouse Gas emissions reporting rule and restating the deadline for promulgation of a final rule, as directed by Public Law 110–161. That law directed EPA to use its existing authority under the Clean Air Act to develop and publish a rule requiring mandatory reporting of greenhouse gas emissions above appropriate thresholds in all sectors of the economy. The Committees are dismayed that the Agency missed its September 26, 2008 deadline to issue a draft rule and direct the Agency to redouble its efforts to meet the June 26, 2009 deadline to promulgate the final rule, as required by law.

Forest Legacy.—The forest legacy program is funded at a total level of \$57,445,000, of which \$8,000,000 is derived from prior-year unobligated funds. This includes \$5,800,000 for program administration and \$51,645,000 for forest legacy projects. The Service is directed to fund projects in priority order according to the competitively-selected national priority list of projects. Within the prioritized projects, the Service is directed to fund the ongoing South Branch, WV project at \$3,670,000. In addition, the Service is directed to fund the Eden Forest project in Vermont at \$1,800,000.

Economic Action Program.—Within the funds provided there is: \$300,000 for the University of Missouri's extension program for a woody biomass technology demonstration project; \$350,000 for the State of Vermont to fund forest products business development grants and technical assistance through the Vermont Wood Products Collaborative; \$500,000 to Purdue University to fund wood products technology development through the Hardwood Scanning Technology Center; \$200,000 to New Hampshire's Northern Forest Center to fund a sustainable forestry and forest products initiative; \$1,700,000 to the Service's Region 5 headquarters to continue infrastructure assistance grants for the region's small forest products businesses; and \$1,923,000 above the request to restore funding for the Wood Education and Resource Center in Princeton, West Virginia, to the fiscal year 2007 enacted level, for a total in all Service accounts of \$2,673,000.

NATIONAL FOREST SYSTEM

(INCLUDING RESCISSION OF FUNDS)

Appropriation enacted, 2008	\$1,469,579,000
Budget estimate	1,349,537,000
Bill, 2009	1,509,805,000

Comparisons:

Appropriations, 2008	+40,226,000
Budget estimate, 2009	+160,268,000

The detailed allocation of funding by program, activity and sub-activity is included in the table at the end of this section of the statement. In addition, the bill also includes the following specific funding levels and directions:

Inventory and Monitoring.—Within the funds provided, \$1,000,000 of the funds provided for the Threat Assessment Centers program is for the NASA Stennis Space Center in Mississippi to acquire remote sensing data to inventory and monitor Federal and non-Federal lands as authorized by Title IV of Public Law 108–148, the Healthy Forests Restoration Act.

Recreation, Heritage, and Wilderness.—The bill provides the fiscal year 2008 funding level, plus fixed costs, plus an increase of \$1,000,000. The Committees on Appropriations expect that each individual National Forest or Grassland will comply fully with all travel management regulatory requirements, particularly the science-based analysis in 36 CFR 212.5 (b)(1), the identification of unneeded roads in 36 CFR 212.5(b)(2), and the criteria for designation in 36 CFR 212.55(a) and (b). The Committees expect the Forest Service to identify priorities, and associated resource requirements, to fully comply with the regulatory requirements of 36 CFR 212.5(b) (1) and (2).

Forest Products.—The bill provides the budget request of \$322,666,000 plus an increase of \$10,000,000. The requested funds should be allocated as stipulated in the President’s budget, following the Northwest Forest Plan. The funding increase should be used for those forests not covered by the Northwest Forest Plan that have budget shortfalls and capacity for additional, successful work.

The Service should consider all contract methods for implementing fuels reduction projects proposed on the Sierra and Sequoia National Forests, including the Kings River, Sugar Pine, Frog, and revised Ice projects, including stewardship contracting authority provided under Section 323 of Public Law 108–7, and utilize available agency funding to accomplish these multiple objectives.

Vegetation and Watershed Management.—The bill supports the budget request to continue leafy spurge eradication on the Dakota Prairie Grasslands in conjunction with the Service’s local partners. There is also a \$500,000 increase within available funding to remediate hazardous materials and other natural resource damage caused by drug cultivation on national forest lands; these funds should be distributed to support high-priority restoration needs following drug eradication activity.

Law Enforcement Operations.—The bill provides \$135,500,000 for law enforcement operations. The Service is expected to use the increase above the request to fund uncontrollable costs, continue efforts to increase the eradication of marijuana from national forest lands and maximize the number of interagency drug enforcement operations conducted with Federal and non-Federal partners. In particular, funding for counterdrug operations on the Daniel Boone

(KY) and Mark Twain (MO) National Forests shall be maintained at no less than their enacted levels.

Valles Caldera National Preserve.—The bill includes \$4,000,000 for the Valles Caldera National Preserve Trust (NM). The increase over the enacted level should be used to fund capital improvements for the preserve.

Land Between the Lakes.—The bill includes the budget request of at least \$8,200,000 in appropriated funds to support activities at the Land Between the Lakes National Recreation Area (KY and TN).

Rescission.—The bill rescinds \$5,000,000 in unobligated, prior balances as proposed in the budget request. The bill language is within the National forest system appropriation instead of as a General Provision as proposed by the Administration.

CAPITAL IMPROVEMENT AND MAINTENANCE

(INCLUDING TRANSFER OF FUNDS)

Appropriation enacted, 2008	\$464,768,000
Budget estimate	405,788,000
Bill, 2009	482,393,000
Comparisons:	
Appropriations, 2008	+17,625,000
Budget estimate, 2009	+76,605,000

The detailed allocation of funding by program, activity and sub-activity is included in the table at the end of this section of the statement. In addition, the bill also includes the following specific funding levels and directions:

Facilities Construction.—Within the funds provided there is: \$200,000 to begin Timberline Lodge water system upgrades, OR; \$600,000 for the Keenwild fire helicopter base, CA; \$185,000 for Uwharrie NF electrical upgrades, NC; \$250,000 for Sumter NF access improvements, SC; \$300,000 for the Kinzua recreation facility, PA; \$1,271,000 for facilities improvements on the Monongahela NF, WV; \$2,500,000 for construction of research field stations and support infrastructure in Hawaii; and \$1,500,000 for construction of a new work station for the Cherokee NF in Tennessee.

Roads Maintenance and Construction.—The bill includes \$162,500,000 for road maintenance and \$66,325,000 for road construction; these allocations reflect new information from the Forest Service concerning appropriate allocations for maintenance versus construction. The construction activity includes \$1,000,000 for road improvements on the Tongass National Forest (AK) and \$825,000 for road improvements on the Monongahela National Forest (WV).

The Service should provide a report to the Committees on Appropriations by May 15, 2009 on road maintenance needs and policy options for designating portions of the Forest Service road system so it would be eligible for the next highway bill funding in a manner similar to Interior department bureaus.

Trails Maintenance and Construction.—The trail maintenance activity should especially consider the needs of the Pacific Crest National Scenic Trail and the Florida National Scenic Trail. Within the funds for trail construction there is \$300,000 for the Humboldt-Toiyabe National Forest (NV) to construct the Reno-to-Tahoe Rim

Trail and \$350,000 for the Monongahela National Forest (WV) trail improvements.

The bill retains previous base funding for maintenance, construction, and operation of the network of national scenic and historic trails; they should be funded at no less than the enacted level.

Legacy Road and Trail Remediation.—The bill provides \$50,000,000 to expand the effort begun last year to begin to remedy the extensive backlog of roads and trails which harm the environment and provide poor public service. The Service should use legacy road and trail remediation funding in a strategic effort to decommission and fix roads and trails in environmentally sensitive areas, focusing on those areas where Forest Service roads may be contributing to water quality problems in streams and water bodies which support threatened, endangered or sensitive species. The Service should utilize public input to help select legacy road and trail remediation projects, and report back to the Committees on Appropriations on the selected projects, and make its selection process and implementation activities readily apparent on the Agency's web site.

The detailed allocation of funding by program, activity and sub-activity is included in the table at the end of this section of the statement. In addition, the bill also includes the following specific funding levels and directions:

Preparedness.—The bill provides the fiscal year 2008 funding level, plus \$6,181,000 for fixed costs, plus \$3,000,000 to continue the firefighter retention initiative funded through P.L. 110–329. The Forest Service should maintain the levels of readiness needed for public safety that were established in fiscal year 2007. The Forest Service should analyze current readiness levels to determine whether maintaining preparedness resources in the field at a level not less than that established in fiscal year 2007 will, based on the best information available, result in lower overall firefighting costs. If the Forest Service makes such a determination, the Service should adjust the levels for preparedness and suppression funding accordingly and report on these adjustments to the House and Senate Committees on Appropriations. The Secretary of Agriculture should advise the House and Senate Committees on Appropriations in writing prior to the decision. In the future, the Committees on Appropriations expect the Service to request preparedness budgets that adequately cover the costs of readiness activities without undue shifts of expenses to the suppression appropriation.

The Committees are very concerned that the Service has not yet finalized or implemented a comprehensive plan to improve firefighter recruitment and retention in Region 5, despite documented vacancies in firefighting positions. The Committees understand that the Service is still studying a range of options to improve firefighter recruitment and retention in Region 5 and other high-risk areas of the nation, including changes to pay rates and scheduling flexibility. Further delay is not acceptable. The Service is directed to provide a comprehensive recruitment and retention plan, including a full spending plan for the funds appropriated in P.L. 110–329, to the Committees by no later than March 1, 2009.

Fire suppression operations.—The bill provides the request, \$993,947,000, for fire operations, an increase of \$148,327,000 above the fiscal year 2008 non-emergency funding level. The Forest Service and the Department of the Interior should continue reports required previously and examine, using independent panels, any individual wildfire incident which results in expenses greater than \$10,000,000.

Hazardous Fuels.—The bill provides \$328,086,000 for the hazardous fuels reduction program, an increase of \$18,000,000 above the fiscal year 2008 level. This funding increase should be used in those areas facing the greatest risk from wildfires because of excessive fuel loads.

The Forest Service should provide no less than \$26,200,000 for the Quincy Library Group's hazardous fuels reduction activities (CA) as proposed in the request.

Rehabilitation.—The bill provides \$11,500,000 to continue the rehabilitation of burned areas program as in fiscal year 2008; the Administration request eliminated this program.

Fire Plan Research and Development.—The bill provides \$23,917,000 to continue the fire plan research and development program.

Forest Health Management Federal Lands.—The bill provides \$17,252,000 for Federal lands forest health management, which includes the requested funding plus \$3,000,000 for a western bark beetle initiative. The increase should be allocated using the National Insect and Disease Risk map; the Service should focus its efforts on areas where tree mortality is expected to exceed at least 25 percent over the next 15 years.

Forest Health Management Cooperative Lands.—The bill provides \$9,928,000 to continue the cooperative lands forest health program.

State Fire Assistance.—The bill provides \$55,000,000 for State fire assistance, an increase of \$19,996,000 above the request. Within the funds provided, \$5,000,000 shall be provided to the South Lake Tahoe Public Utility District for the Lake Tahoe Community Fire Protection Project. These funds should be used by local utility districts to fund their highest priority fire protection projects such as increasing water pressure or installing new fire hydrants. Funds are to be matched by local water utility districts on at least a one-to-one basis.

Volunteer Fire Assistance.—The bill provides \$9,000,000 for volunteer fire assistance, an increase of \$1,000,000 above the request.

ADMINISTRATIVE PROVISIONS, FOREST SERVICE

The bill includes administrative provisions similar to previous years. This includes limiting transfers to the USDA for reimbursable charges to the requested amount and allowing up to \$50,000,000 to be assessed for fire, administrative and other facilities maintenance. The bill provides \$3,000,000 for the National Forest Foundation and \$3,000,000 for the National Fish and Wildlife Foundation; it is acceptable for these foundations to make grants to Federal recipients, including Forest Service offices. Bill language in Title IV, General Provisions, prevents any funding for the competitive sourcing program.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

INDIAN HEALTH SERVICE

INDIAN HEALTH SERVICES

Appropriation enacted, 2008	\$2,971,535,000
Budget estimate	2,971,533,000
Bill, 2009	3,190,956,000
Comparisons:	
Appropriations, 2008	+219,421,000
Budget estimate, 2009	+219,423,000

The detailed allocation of funding by program area and activity for the Indian Health Services account is included in the table at the end of this section of the statement. In addition to specifying these amounts, the bill includes the following directions:

Domestic violence within the American Indian and Alaska Native (AI/AN) communities continues to be an area of serious concern. Children in these communities have the second highest rate of maltreatment in the country, and one in three AI/AN women will be physically or sexually abused in her lifetime. In order to provide the Indian Health Service (IHS) with additional tools to better address child and family violence in AI/AN communities, the bill includes \$7,500,000 to implement a nationally coordinated domestic violence prevention initiative. With these funds, the IHS is encouraged to further expand its outreach advocacy programs into Native communities, expand the Domestic Violence and Sexual Assault Pilot project already in operation; and use a portion of the funding for training and the purchase of forensic equipment to support the Sexual Assault Nurse Examiner program (SANE). Within 90 days of enactment, the Service should provide an outline of how funds will be allocated, and an assessment of next steps to be taken to further advance the various components of this initiative in the coming fiscal year. The report should also address the Service's progress in developing standardized sexual assault policies, as well as a cost estimate for full implementation of the SANE program.

An additional amount of \$2,500,000 is provided to support the Service's health information technology efforts. The House and Senate Committees on Appropriations view the various components of this program—from electronic records management to telehealth technologies—as essential to the increased availability of quality health services throughout Indian Country.

The Service, and particularly the Director of Oral Health, is strongly encouraged to redouble its efforts to address the alarmingly high vacancy rates among health professionals, for example 31 percent among dental professionals, in the Indian Health Service. Therefore, an increase of \$8,299,000 over the fiscal year 2008 enacted level has been provided for Dental Services in order to maintain current levels of care and provide for the staffing of new facilities.

The bill provides \$16,391,000 to continue the grant program to treat and prevent methamphetamine abuse. This is an increase of \$2,609,000 over the amount provided in fiscal year 2008, and it is expected that the Service will use a portion of the funding for the treatment of behavioral and mental health problems associated with methamphetamine use. To determine the effectiveness of this program, which was initiated in fiscal year 2008, the Service is directed to report on the progress, accomplishments, and achievements of this program to the Committees on Appropriations within 60 days of enactment of this legislation. In addition, the Service is encouraged to participate in the Fetal Alcohol Spectrum Disorders and Alcohol Screening, Intervention and Referral Initiative.

The Indian Health Service is directed to use the Indian Health Care Improvement Fund to bring the units with the highest level of need up to at least 40 percent before allocating funds to units with needs above 40 percent.

Within the resources available to the Hospitals and Clinics program, the Service is encouraged to provide such assistance as may be necessary for the newly formed Nevada Indian Health Board to fully establish its operations.

Within the amount provided for Indian Health Professions, it is expected that the Service will fund the InMed, RAIN and InPsych programs at no less than the current levels and manage them in the same manner as in prior years. The Service is also expected to use health professions program funding for loan repayment and scholarship programs to encourage increased recruitment and retention of health professionals.

The Service is directed to re-examine the policies it currently has in place for the integration of newly recognized tribes into the IHS system. There have been complaints regarding the length of time it now takes for a newly recognized tribe to obtain the funding and services to which it is entitled under the law. While acknowledging the budgetary constraints within which the IHS must operate, it is not unreasonable for newly recognized tribes to expect that a process would be in place for the prompt assessment of tribal needs, the subsequent development of a specific plan for the delivery of health services and funding, and a timeline for doing so. The Service is directed to report to the Committees on Appropriations within 90 days of enactment of this legislation with recommendations for the improvement of the current ad hoc system.

INDIAN HEALTH FACILITIES

Appropriation enacted, 2008	\$374,646,000
Budget estimate	353,329,000
Bill, 2009	390,168,000
Comparisons:	
Appropriations, 2008	+15,522,000
Budget estimate, 2009	+36,839,000

The detailed allocation of funding by program area and activity for the Indian Health Facilities account is included in the table at the end of this section of the statement. In addition to specifying these amounts, the bill includes the following directions:

The bill provides \$40,000,000 for health facilities construction, but it does not allocate specific projects within that amount. Instead, the Service is directed to select projects from the priority list based upon readiness, as well as need, and report to the Committees on Appropriations within 60 days of enactment on the specific construction projects it intends to fund. It is expected that facilities funding will continue to be distributed in a manner that addresses the fluctuating annual workload and maintains parity among tribes and Indian Health Service areas as the workload shifts. The Service is further expected to use savings achieved from completed health care facilities construction projects to continue other high priority projects from the Service’s construction list.

The high vacancy rate of health professionals in the Indian Health Service has not been substantially alleviated by current recruitment and retention efforts. To the extent possible, the Service is encouraged to use the construction and improvement of staffing quarters as a vital tool to recruit and retain these health professionals.

Within the overall amount provided for construction, the House and Senate Committees on Appropriations recommend \$500,000 for new mobile dental units. There is a concern, however, that high dental vacancy rates have left newly constructed units unstaffed. The Service should attempt in the distribution of these funds to ensure that staffing will be available for new units and that construction can be initiated in an expeditious manner once funds are committed.

No resources have been provided for the joint venture and small ambulatory grants programs because all qualified projects on the existing list have been completed. These programs have broad support, and the Service is directed to initiate new solicitations for both in this fiscal year. As in the past, the Service is encouraged to provide additional credit to tribes that are willing to provide full funding for facility equipment in addition to providing full funding for facility construction when determining priorities for project funding under the joint ventures program for hospitals and clinics.

The recent GAO findings on the Indian Health Service's inventory management system are of particular concern. Although the IHS has reportedly taken steps to address the issues specifically identified in the report, the GAO is directed to conduct a follow-up investigation of the Service's inventory management system to ensure that proper safeguards have been put in place to ensure full accountability. In addition, the IHS is strongly encouraged to evaluate its entire inventory management system, take necessary steps to correct any deficiencies, and report to the Committees on Appropriations on these efforts no later than 60 days after enactment of this Act.

An amount of up to \$2,700,000 from within funds from both the "Facilities" and "Services" accounts is designated in the bill for the purchase of ambulances through an existing agreement with the General Services Administration. This is an increase of \$1,700,000 from previous years and reflects the current GSA estimate of \$100,000 per replacement vehicle.

The detailed allocation of funding by program area and activity for the Salaries and Expenses account of the Smithsonian Institution is included in the table at the end of this section of the statement. This allocation reflects the decision to reallocate \$10,000,000 from the budget request for facilities to restore reductions proposed in the budget for public programs, education, and research. The reallocation includes \$5,000,000 from facility services in the Salaries and Expenses account and \$5,000,000 from facilities planning in the Facilities Capital account. While the bill maintains the traditional structure for appropriating facility funding in the two accounts, the House and Senate Committees on Appropriations request that the Secretary of the Smithsonian review this structure to determine whether a consolidation of these funds under the Facilities Capital account would provide a more systemic review of facility funding requirements throughout the Institution.

Government Accountability Office Review of Reform Process.—The House and Senate Committees on Appropriations believe that much progress has been made by the Smithsonian to address the failures which contributed to a decline in Congressional and public confidence in the management and governance of the Smithsonian Institution. The appointment of a new Secretary, the restructuring of a more active Board of Regents, and the adoption of a series of policy changes to correct fiscal and management failures are very positive signs. The Committees believe, however, that these are only the initial steps and that a continuing commitment to reform, especially to the principals of fiscal stewardship of public resources, and to accountability and openness, are essential. The Committees

request that the Government Accountability Office conduct a thorough review of the reform process and submit a progress report to the Committees no later than December 31, 2009.

National Zoo.—The House and Senate Committees on Appropriations are pleased that the National Zoo has recently received full accreditation from the Association of Zoos and Aquariums (AZA). The Committees recognize, however, that maintaining accreditation is an on-going process and encourage the Smithsonian to give priority in allocating resources to meet continuing staffing needs identified during this year's AZA review.

Reprogramming Guidelines

The reprogramming requirements for fiscal year 2009 applicable to funds appropriated in this Act for programs under the jurisdiction of the Interior, Environment and Related Agencies Subcommittees remain the same as in effect for fiscal year 2008 with one exception (see H. Rept. 110–187, pages 190–191). In addition to these requirements, the Committees on Appropriations direct that all major reorganizations be submitted for review prior to their implementation.

Workforce planning

The Department of the Interior is a highly staff-intensive agency employing approximately 70,000 people. This staff is distributed throughout eight major bureaus and numerous other offices. Similarly, the Environmental Protection Agency, which employs over 17,000 staff, has 12 offices within headquarters, 10 regions and scores of laboratories and centers, while the Forest Service has over 30,000 employees in over 750 offices in 48 States and territories. The Committees on Appropriations are concerned that workforce plans for the Department of the Interior, the Environmental Protection Agency and the Forest Service are in many cases outdated and that no comprehensive review of appropriate staffing needs for the future has been undertaken. The Committees request that the Government Accountability Office conduct a review of existing workforce planning processes throughout these institutions and make recommendations for changes based on appropriate best-practices models used by other federal agencies. The Committees request this report be submitted no later than December 31, 2009. HRSA shall brief the Committees on Appropriations of the House of Representatives and the Senate on the terms and conditions of its proposed request for application prior to its public release.
