

United States Department of the Interior

OFFICE OF THE SECRETARY
Washington, D.C. 20240

JAN 25 1993

Honorable Russell Hawkins
Chairman, Sisseton-Wahpeton Sioux
Tribal Council
Route 2 - Agency Village
Sisseton, South Dakota 57262

Dear Chairman Hawkins:

On December 11, 1992, we received the Tribal-State Compact for Control of Class III Games of Chance for the Sisseton-Wahpeton Sioux Tribe (Tribe) in North Dakota (State).

We have reviewed the Compact and conclude that it does not violate the Indian Gaming Regulatory Act (IGRA), Federal Law, or our trust responsibility. Therefore, pursuant to my delegated authority and Section 11 of the IGRA, we approve the Compact. The Compact shall take effect when notice of our approval, pursuant to Section 11(d)(3)(B) of the IGRA, is published in the FEDERAL REGISTER.

Please be advised that Section 11(d) of the IGRA requires the Chairman of the NIGC to approve tribal ordinances authorizing Class III gaming. On July 8, 1992, the NIGC's proposed regulations to govern approval of Class II and Class III gaming ordinances were published in the FEDERAL REGISTER. Once the regulations become final and are in effect, we expect the NIGC will request submission of existing ordinances for review and approval in accordance with the standards contained in the final regulations. It may be useful for the Tribe to review the proposed regulations to insure that the Tribe's ordinances are consistent with or do not otherwise conflict with NIGC requirements.

We wish the Tribe and the State success in this economic venture.

Sincerely,

/s/ Eddie F. Brown

The term "electronic game of chance" does not include the operation and play of devices which utilize mechanical or optical sensors to evaluate reel positions when they come to rest after being spun for game play.

6.2 Display.

Game play may be displayed by:

- (a) Video facsimile; or
- (b) Mechanical rotating reels whereby the software of the device predetermines the stop positions and the presence, or lack thereof, of a winning combination and pay out, if any.

6.3 Testing of Video Games of Chance.

reporting system which has been approved by the
Qualified Gaming Test Laboratory. However,
should the Tribe maintain individual machines
or clusters of machines apart from a major
casino location, all coin hoppers shall be com-

- (i) Microprocessor Compartment. The compartment containing
the microprocessor-controlled device within the cabinet
of the electronic game of chance must be locked and
sealed, and unlocked by a different key than the key
which unlocks the cabinet or cash compartment. The
compartment may only be opened in the presence of a
tribal official or a security officer appointed by the
Tribe. The key to the microprocessor compartment shall
be kept by the Tribe in a secure place.
- (j) Secure Electronic Components.
 - (i) Logic Boards and software Erasable Programmable
Read Only Memory (EPROM) chips and other logic
control components shall be located in a
separate compartment within the electronic game
of chance and that compartment shall be sealed
and locked with a different key or combination
than that used for the main cabinet door, and
cash compartment.
 - (ii) Upon installation, the Tribe shall affix or
cause to be affixed to the EPROM chip of each
electronic game of chance a strip of security
tape, capable of evidencing the removal of the
EPROM chip if the EPROM chip is removed from

the circuit board. The security tape shall be secured and available only to the authorized personnel of the Tribe. The Tribe shall maintain accurate and complete records of the identification number of each EPROM chip installed in each electronic game of chance.

- (k) Secure Cash Compartment. The coins and currency compartment shall be locked separately from the main cabinet area, and secured with a different key or combination than used for the main cabinet door, except that a separate cash compartment shall not be required for coins necessary to pay prizes in a machine which pays prizes through a drop hopper as permitted in this section. Cash compartment keys must be kept in a secure location. Except as provided in this section, the compartment in which the inserted coins and bills are deposited shall be locked at all times. An employee or official of the Tribe may open the cash compartment in the gaming cabinet for the purpose of collecting the accumulated cash. The person collecting the accumulated cash shall record the amount collected.

Each electronic game of chance must have a true random number generator that will determine the occurrence of a specific card, symbol, number, or stop opposition to be displayed on the electronic screen or by the mechanical rotating reels. A selection process will be considered random if it meets all of the following requirements:

- (i) Chi-Square Analysis. Each card, symbol, number, or stop position, which is wholly or partially determinative satisfies the ninety-nine percent (99%) confidence limit using the standard chi-square analysis.
- (ii) Runs Test. Each card, symbol, number, or stop position does not as a significant statistic produce detectable pattern of game elements or occurrences. Each card, symbol, number, or stop position will be considered random if it meets the ninety-nine percent (99%) confidence level with regard to the "runs test" or any generally accepted pattern testing statistic.
- (iii) Correlation Analysis. Each card, symbol, number, or stop position is independently chosen without regard to any other card, symbol, number or stop position, drawn within that game play. Each pair of card, symbol, number, or stop position is considered random if they meet the ninety-nine percent (99%) confidence level using standard correlation analysis.
- (iv) Serial Correlation Analysis. Each card, symbol, number, or stop position is independently chosen without reference to the same card, number, or stop position in the previous game. Each card, number, or stop position is considered random if it meets the ninety-nine percent (99%) confidence level using standard serial correlation analysis.
- (v) Live Game Correlation. Video games of chance that are representative of live gambling games must fairly and accurately depict the play of the live game.

- (b) Software Requirements for Percentage Payout. Each electronic game of chance must meet the following maximum and minimum theoretical percentage payout during the expected lifetime of the game:
- (i) Video games that are not affected by player skill shall payout a minimum of eighty percent (80%) and no more than one hundred percent (100%) of the amount wagered. The theoretical payout percentage will be determined using standard methods of probability theory;
 - (ii) Video games that are affected by player skill, such as electronic draw poker and blackjack, shall pay out a minimum of eighty-three percent (83%) and no more than one hundred percent (100%) of the amount wagered. This standard is met when using a method of play that will provide the greatest return to the player over a period of continuous play.
- (c) Minimum Probability Standard for Maximum Payout. Each electronic game of chance must have a probability of obtaining the maximum payout which is greater than one in seventeen million (1 in 17,000,000) for each play.
- (d) Software Requirements for Continuation of Game After Malfunction. Each game must be capable of continuing the current game with all current game features after a game malfunction is cleared. This provision does not apply if a game is rendered totally inoperable; however, the current wager and all player credits prior to the malfunction must be returned to the player.
- (e) Software Requirements for Play Transaction Records. Each game must maintain a electronic, electromechanical, or computer system, approved by the Qualified Gaming Test Laboratory, that shall record and maintain essential information associated with machine play. This information must be for a minimum of thirty (30) days, regardless of whether the machine is being supplied with power.
- (f) No Automatic Clearing of Accounting Meters. No game may have a mechanism by which an error will cause the electronic accounting meters to automatically clear. All meter readings must be recorded and dated in the presence of a tribal official both before and after the electronic accounting meter is cleared.
- (g) Display of Information. The display information required shall be kept under glass or another transparent substance and at no time may stickers or other removable devices be placed on the machine face.

(h) Rules Display. The machine shall display:

- (i) The rules of the game prior to each game being played;
- (ii) The maximum and minimum wagers, the amount of credits which may be won for each winning hand or combination of numbers or symbols; and
- (iii) The credits the player has accumulated.

Provided, however, in the case of an electronic game of chance with a mechanical display, the information required shall be permanently affixed on the game in a location which is conspicuous to the player during play.

6.7 Removal and Correction.

Any machine confirmed to be in non-compliance with this Compact shall be removed from play by the Tribe and brought into compliance before reintroduction.
