Abstract: Research and monitoring findings are essential to fulfilling the U.S. Geological Survey’s (USGS) responsibility under the Earthquake Hazards Reduction Act to develop earthquake hazard assessments and record earthquake activity nationwide. Residents, emergency responders, and engineers rely on the USGS for this accurate and scientifically sound information. The USGS Earthquake Hazards Program funds external investigators to carry out these important activities. In response to our Program Announcements, investigators submit proposals for research and monitoring activities on earthquake hazard assessments, earthquake causes and effects, and earthquake monitoring. This information is used as the basis for selection and award of projects meeting the USGS’s Earthquake Hazards Program objectives. Final reports of research and monitoring findings are required for each funded proposal; annual progress reports are required for awards of a two- to five-year duration. Final reports are made available to the public at the website http://earthquake.usgs.gov/research/external/.
